SUMMARY

Full Stack Developer with experience building full-stack web applications using React and Node.js. Strong understanding of backend systems including REST APIs, JWT authentication, and database design. Focused on writing clean code and improving system performance.

TECHNICAL SKILLS

Languages: JavaScript, Java, Python

Frontend: React, HTML, CSS

Backend: Node.js, Express, Spring Boot

Databases: MySQL

Tools: Git, Linux

AI Tools: ChatGPT, Claude (used for debugging, code understanding, and development support)

PROJECTS

E-Commerce Application (Full-Stack)

Technologies: React, Node.js, Express, MongoDB

- Developed a full-stack e-commerce application with JWT-based authentication.
- Built REST APIs for product management, cart functionality, and order processing.
- Implemented cart logic with database integration and validation checks.

Event Management System (Full-Stack)

- Built a multi-role platform supporting user, event owner, venue owner, and admin roles.
- Implemented role-based access control for managing permissions.
- Developed REST APIs for event creation, booking, and venue management.

EXPERIENCE

Software Developer Intern | SpringUp Labs | May 2025 – Present

- Built and improved REST APIs using Node.js and Express for application features
- Implemented pagination to efficiently handle large datasets
- Worked on authentication and role-based access control for secure user management
- Debugged and improved backend and frontend features to enhance performance and stability

Web Developer Intern | SETTribe, Pune | December 2024 – February 2025

- Developed web application features using PHP, JavaScript, and MySQL.
- Implemented frontend and backend functionality for dynamic user interaction.

EDUCATION

Bachelor of Engineering in Computer Science | Savitribai Phule Pune University | JSPM Narhe Technical Campus, Pune
2019 – 2024
